**Subject:** RE: Final EPA Deliverable

Chip and Kristine –

The Draft FS Key Elements Check in materials have been posted to:

PHCP Files | Documents Under Review | 2011-06-06\_FS Key Elements

LWG will go over these materials in a series of presentation/discussions on June 21 and 22 as previously discussed. Note that the materials are numbered in a logical sequence as follows (pdf file names noted after each number):

1. 01 Introduction and Refinements of EPA SMAs
2. 02 Focused PRGs and Benthic SQVs Summary
3. 03 RALs and RALs Rationale Summary
4. 04 RALs Relationship to PRGs
5. 05 Proposed SMAs Summary
6. 06 Methods for Volume Determinations Using RALs for Each Alternative

7. 07 Comprehensive Alternatives Summary
8. 08 Volume Cost Methods Examples
9. 09 Mitigation Cost Method Description
10. 10 Detailed Analysis of Alternatives Example Graphics

However, given that EPA/LWG have not finalized the agenda for the June 21<sup>st</sup> and 22<sup>nd</sup>, we believe there is opportunity to discuss some of these materials in a different sequence, if desired.

An additional EPA request was a review of how EPA's FS Tools Memos comments would be addressed in the draft FS. As discussed with you recently, discussions were only recently concluded on a path forward for these comments and the LWG is currently working to provide you with this information as soon as possible.

Please let me or Jim McKenna know if you have any questions about the materials.

Thanks.

Carl
